Components of the highest quality

- Save installation time with the new Silensys ready to install outside condensing unit for commercial refrigeration:
 - liquid receiver,
 - liquid line sight glass,
 - liquid line filter drier,
 - crankcase heater,
 - HBP/LBP auto reset pressure switch,
 - pressure actuated fan speed control,
 - compressor contactor,
 - internal electrics pre-wired in a control box,
 - a start delay times for the second compressor on twin compressor models.

Options available: HBP/LBP pressure switch with manual reset, liquid receiver with fusible plug, sight glass on receiver with fusible plug for 2 fan motors models.

- **Greater safety** with an external switch disconnector padlockable in the ON or OFF position. (1)
- **Underside cover** available for wall-mounted Silensys units for even better aesthetics. (2)
- **Even greater noise reduction for your customers.**

Low noise levels:

- The **fan speed controller** ensures that noise levels are reduced in low ambient conditions especially at night and/or in colder temperatures.
- The **aerodynamic shape of the fan blades** reduces noise and ensures optimum airflow.(3)
- **Sound insulation** of the compressor compartment.

With an underside cover / Pohjan koristepaneeli
