To whom it may concern,

REACH Legislation (Registration, Evaluation, Authorisation of Chemicals).

Your request to Petronas Lubricants Belgium for newest declaration – (on our supplies of SUNoco series oils - pre-registration and presence of SVHC/current candidate list)

At this time we can confirm to you that the necessary pre-registration of all substances we are importing has been carried out by us. We, ourselves are NO manufacturer of substances. We only use substances in (oil)blends.

We also ascertain you that all our suppliers confirmed that the pre-registration of the substances we use to supply to our customers (also to you) has been carried out.

There are no (Sunoco) products we are aware of that will not be compliant with REACH. In fact, all products you are purchasing from us continue to be REACH legally available after Nov. 30 2008.

Nor are there any substances of very high concern (SVHC) present in our products that are currently on the candidate list, being applied in our oil formulations (=preparations according Reach). Nor do we expect these to be there in the foreseeable future.

We expect this confirmation/declaration to be sufficiently comforting you for the time being, if not, then please advise us.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "De Landtsheer". The signature is stylized and cursive.
